Qualitative disclosures

a. Governance of liquidity risk management

The Board of Directors of Cathay Bank head office delegates the responsibility for managing the overall liquidity of Cathay Bank Hong Kong Branch (CBHK) to CBHK's Assets and Liabilities Committee (ALCO). The ALCO formulates both the long-term strategy for funding sources and short-term tactics to address prevailing conditions. CBHK manages its liquidity risk in accordance with Liquidity Risk Management Policy which provides a set of guidelines for the prudent management of liquidity in the normal course of business. It also sets out the responsibilities of the ALCO and functional units for liquidity risk monitoring, control and reporting.

b. Funding strategy

CBHK maintains an appropriate mix of high quality liquid assets as a source of liquidity cushion for meeting emergency funding needs. The amount and composition of such assets should be determined with reference to the business need and liquidity risk profile. In managing the funding strategy, CBHK establishes a clear strategy for holding liquid assets, determines the appropriate volume, tenor and mix of such holdings.

c. Liquidity risk mitigation techniques

To mitigate the liquidity risk, CBHK maintains an adequate cushion of unencumbered, high quality liquid assets that can be reliably sold in the markets to obtain funds to meet CBHK's liquidity needs at all times, even in periods of severe idiosyncratic and market stress. The size of the liquidity cushion reflects CBHK's established risk tolerance and should be sufficient to cover funding gaps generated from the liquidity stress scenarios.

d. Stress testing

CBHK conducts regular stress tests on cash flows by applying various "what if" scenarios on the liquidity positions for all currencies in aggregate so as to ensure that CBHK has adequate liquidity to withstand stressed conditions. These stress tests are separately conducted for positions in HKD, USD and other foreign currencies in which CBHK has significant positions. To ensure that liquidity is managed in line with the risk tolerance, the type of scenarios and survival period are set for monitoring and control.

e. Contingency funding plan

CBHK's Liquidity Contingency Policy defines the framework and basic principles of liquidity contingency management and stipulates the tools and procedures for the application of these principles. It provides guidance for the monitoring of liquidity positions and identification of liquidity contingency issues occur and identifies the tools for managing liquidity contingency situations.
