## Net interest income before provision for credit losses

Net interest income before provision for credit losses decreased $\$ 8.9$ million, or $6.2 \%$, to $\$ 134.5$ million during the second quarter of 2020, compared to $\$ 143.4$ million during the same quarter a year ago. The decrease was due primarily to a decrease in interest income from loans and securities.

The net interest margin was $3.02 \%$ for the second quarter of 2020 compared to $3.58 \%$ for the second quarter of 2019 and $3.34 \%$ for the first quarter of 2020.

## Provision for credit losses

Based on a review of the appropriateness of the allowance for loan losses at June 30, 2020, the Company recorded a provision for credit losses of $\$ 25.0$ million in second quarter of 2020 compared to no provision for credit losses in the second quarter of 2019. The provision for credit losses is primarily a result of the economic deterioration of the global economy resulting from the COVID-19 pandemic. The Company will continue to monitor the continuing impact of the pandemic on credit risks and losses, as well as on customer demand deposits and other liabilities and assets. As permitted under the Coronavirus, Aid, Relief and Economic Security Act (the "CARES Act"), the Company has chosen to defer the adoption of the Current Expected Credit Losses (CECL) methodology for estimated credit losses until the earlier of the date the US government declares an end to the national emergency or December 31, 2020. The expected impact of CECL on second quarter results, if CECL had been adopted, will be disclosed in our Form 10-Q for the second quarter of 2020. The following table sets forth the charge-offs and recoveries for the periods indicated:

The increase was primarily due to a $\$ 2.5$ million increase in net gains from equity securities, and an increase of $\$ 1.1$ million from the gain on sale of
mortgage backed securities, offset in part by a $\$ 682.1$ thousand decrease in the valuation of interest rate swap contracts, when compared to the same quarter a year ago.

The decrease in non-interest expense in the second quarter of 2020 was primarily due to a $\$ 5.0$ million decrease in salaries and employee benefits resulting from lower bonus accruals and an increase in salaries capitalized for loan originations offset in part by an increase of $\$ 3.8$ million in amortization expense of investments in low-income housing and alternative energy partnerships when compared to the same quarter a year ago. The efficiency ratio was $44.8 \%$ in the second quarter of 2020 compared to $44.5 \%$ for the same quarter a year ago.

Income taxes
